

Proposition of TC advise to FMJD-EB

Rome, April 13th, 2019

Classification for World Cup events

World Cup event are played with Solkoff-Truncated. Usually we do not have free time for any barrages but last 3 years we had 4 events with shared places. Twice on the podium.

Proposition - Use "Baliakin system".

My estimation shows that probability of same value is low. Even more ... I did not find such a situation after simulation of tournaments past 3 years.

Please consider that really, we need to get final classification without shared places.

I see two options:

1. Baliakin system as a first tie-break criterium (after points of course) – **this is my preference!**
2. Use Baliakin system as a next criterium after Solkoff truncated.

Baliakin system

$$((\sum_1^n score * ST) - \min) / 100$$

N – number of opponents

Score – opponents score (points)

ST – opponents Solkoff Truncated

Min – minimal value

(see examples – next pages)

Example (from Turkish Open 2019) how it is working

These two players shared places 8-9:

Xionng				Shaibakov			
opponent	(a) his points	(b) solkoff	(a)*(b)	opponent	(a) his points	(b) solkoff	(a)*(b)
Ijzendoorn	11	87	957	Bhawanibhiek	9	72	648
O.Fedorovich	9	78	702	Andreev	10	78	780
Getmanski	11	87	957	Sadowska	10	80	800
Anikeev	12	88	1056	Georgiev	12	84	1008
Tanssykuzhyna	9	79	711	Ijzendoorn	11	87	957
Bobkov	9	81	729	D.Fedorovich	9	72	648
Andreev	10	78	780	O.Fedorovich	9	78	702
Li	11	83	913	Valneris	11	88	968
Amrillaev	10	82	820	Getmanski	11	87	957
		Sum	7625			Sum	7468
		min	702			min	648
		Sum-min	6923			Sum-min	6820
		/100	69,23			/100	68,20

Recalculated final score

- See four examples from World Cup and semi from last WC
- Results are sorted with Baliakin system.
- Score of Baliakin system shown after points, then Solkoff truncated.
- Last column shows place at the tournament with Solkoff truncated. If place is different with Baliakin system – we can see the difference
- Very interesting score of Turkish Open 2017
